Security Sales Executive

All of these certifications mean nothing unless the basic blocking and tackling are not done correctly. How about starting with just patching? Many can't even do this? Data hygiene and an accurate CMBD ... then, roadmap, SDLC, and strategy mapped to business objectives ... just some basic core ingredients that should improve your current cyber resilience ...

Cyber Security Engineer at VirtualArmour

Job ads are written by HR or recruiters who have no idea what the majority of these are. I've seen plenty of entry-level/junior roles requiring the CISSP

IT Security & Cloud Engineer @ qordata PK

Came across these job postings and had to do a double-take. They're asking for a CISSP for a System and Network Administrator role – because apparently, we're all secret agents now. And for an MS Azure Cloud Administrator, they want a CEH, as if we're in a virtual battle with digital hackers. Somebody hand these recruiters a tech-savvy guide · ...see more
